

AV136 - Contents

Section 1: Carlisle to Workington
After departing Carlisle we pass another 108 on the down. A coal train stands in Maryport Open Cast as we pass and then call at Flimby. At Workington we let the first unit continue after a cleaned windscreen.

Section 2: Workington to Whitehaven
Joining the next southbound service we see Class 20s on weed killing and a 155 in the yard. After calling at Harrington we travel over the single line on the sea wall to Parton. After a signal check we enter Whitehaven bay. Our unit then returns to Carlisle.

Section 3: Whitehaven to Barrow-in-Furness
Joining the driver in the cab we enter Whitehaven tunnel and head towards the light of Corkickle and Braystones. After Sellafield we see the green 108 on the down and the Flying Scotsman in the yard. From Drigg to Bootle we travel over the down line due to relaying on the up. Back on the up line, and back in the cab, we stop at more stations before Barrow.

Section 4: Barrow-in-Furness to Carnforth
A number of unit movements take place at Barrow before continuing south, soon arriving at Arnside then Carnforth where we leave our 108 for Preston.

Section 5: Oxenholme to Windermere
After having fitters' attention we join our 108 to travel from Oxenholme. It's not very long before we arrive at Windermere and watch waiting passengers join.

Running time of this DVD-R is 59 minutes.
